Subject: Regarding Micro StationRadio Broadcasting Service Petition Room # 9208 ..due date 4/26/98

Dear Chairman, This is my first email to the govt and also an attachment.

I am also using the mail in case this doesn't work.

Your interest in getting more minorities and new entrants into radio is a great idea. While big radio groups deliver big audiences and profits ..they do not expand the diversity and many voices in our republic. Without messing up our present system we can accommodate both goals. Maintain good clean frequencies for our established broadcasters while using our sophisticated computers and technology to squeeze in more smaller stations to make the entrant and number of voices more multitudinous. The more voices ..the more democratic we are and able to preserve free speech ,both political and economic. I am starting to ramble. My filing is attached. Can your staff e mail me that it gets to room 9208 and is part of the comments.

Thanks for your time.
